

ChemTrack3000

chemical inventory management system
track and trace solution

chemical inventory management solution introduces traceability within organization. Every single use of chemical is tracked and accountable. Fast and easy solution reduces occupational hazard factor and increases usage accuracy and productivity.

Revolutionary Tracking Application

In current enterprise environment traceability will be a key issue to profit and productivity. Being able to track every consumable reduces required inventory and thus reduces expenditure. Also being able to retrieve information fast during emergency will be a key criteria for sustainability.
